Innovations in First-Year Writing Curriculum

**Content-Rich Curriculum,
Project-Based Learning,
and ePortfolios**

Julie Lindquist, renown Rhetorician and writing teacher, suggests that we question the idea that "teaching inclusively is (only) a matter of teaching 'about' diversity, rather than a matter of creating storied learning experience."

A blend of Project-Based Learning with content-rich courses can empower students to experience and explore storied learning on their own terms. They can track, document, and share their work through ePortfolios.

Mary Louis Pratt's "Arts of the Contact Zone"

Mary Louise Pratt's keynote address at the 1990 Responsibilities for Literacy Conference [NCTE Affiliate] recognized the valuable tools schools give to students but found it "unforgivable that schooling itself" gives students nothing meaningful to do with these tools and knowledge.

I propose that ePortfolios combined with other High Impact Practices [HIPs] –more specifically, Project-Based Learning—can cultivate rich experiences that build on what students know and what they want to know through Signature Assignments.

This blend can help faculty members create storied learning experiences.

This is an argument for more flexibility in the way we optimize common intellectual experiences [general education and pathways courses] through Project-Based Learning that includes transparent learning, shared in student ePortfolios.

- When well done, Project-Based Learning [PBL] provides unique opportunities for students to build self-confidence and academic independence as they self-select the project scope, research, readings, purpose, and target audience. Research verifies that PBL enhances learning across demographics; PBL creates more equity and access through quality research opportunities.
- ePortfolios use in content-rich courses provides unique opportunities for students to build self-contained, reflective websites that document the exploration, research, and content-specific documentation processes through multi-modal discourse strategies, like images, hyperlinks, videos, and embedded objects.

What is Project-Based Learning?

PBL is a curricularly integrative, real-world, multi-phase, iterative project completed over an extended process [8+ week] that involves stakeholders beyond the classroom.

>Authentic Assignment

real world relevance & application

>Authentic Audience

ELEMENTS

TEACHING PRACTICES

Hypotheticals

Imagined
Scenarios

**NO MORE FAKE
Assignments**

AAC&U <https://www.aacu.org/>

Signature Assignments

PRINCIPLE ONE

AIM HIGH—AND MAKE EXCELLENCE INCLUSIVE

Make the Essential Learning Outcomes a Framework for the Entire Educational Experience, Connecting School, College, Work, and Life

PRINCIPLE TWO

GIVE STUDENTS A COMPASS

Focus Each Student's Plan of Study on Achieving the Essential Learning Outcomes—and Assess Progress

PRINCIPLE THREE

TEACH THE ARTS OF INQUIRY AND INNOVATION

Immerse All Students in Analysis, Discovery, Problem Solving, and Communication, Beginning in School and Advancing in College

PRINCIPLE FOUR

ENGAGE THE BIG QUESTIONS

Teach through the Curriculum to Far-Reaching Issues—Contemporary and Enduring—in Science and Society, Cultures and Values, Global Interdependence, the Changing Economy, and Human Dignity and Freedom

PRINCIPLE FIVE

CONNECT KNOWLEDGE WITH CHOICES AND ACTION

Prepare Students for Citizenship and Work through Engaged and Guided Learning on “Real-World” Problems

PRINCIPLE SIX

FOSTER CIVIC, INTERCULTURAL, AND ETHICAL LEARNING

Emphasize Personal and Social Responsibility, in Every Field of Study

PRINCIPLE SEVEN

ASSESS STUDENTS' ABILITY TO APPLY LEARNING TO COMPLEX PROBLEMS

Use Assessment to Deepen Learning and to Establish a Culture of Shared Purpose and Continuous Improvement

PBL / Signature Assignments

Stack HIPs within the
classroom curriculum =
greater access to HIPs=
greater equity

Error and Expectations

How do ePortfolios function with PBL?

Three common possibilities include:

- Repository
- Workspace
- Showcase

ePortfolio Functions

According to Abrami & Barrett (2005), ePortfolios can have three distinct functions that can be divided into three distinct levels.

ePortfolios as Nesting Dolls

These student/team's ePortfolio workspaces can be duplicated in three clicks, then polished-up to be hyperlinked and showcased.

2023 AAEEBL Student Panel
DAY 2: Friday, July 14, 1:00-2:25PST / 4:00-5:25 EST

This year's AAEEBL Student Panel features a panelist ePortfolio, a general session, and breakout rooms to maximize our time as we hear and learn from our students. Panelists include voices who are relatively new to ePortfolios and seasoned pros with ePortfolio experiences from undergraduate and graduate programs. Join us as we hear student perspectives, look to the chat for Q&A, then open breakouts to learn more about the opportunities and challenges that students face with ePortfolios.

The Student Panel features a variety of voices: a sophomore fresh out of her first ePortfolio course, ePortfolio student ambassadors/consultant, a graduate student who uses an ePortfolios as part of her course projects, and more.

Q&A

Re-Framing Course Content through Practical Applications:
An Immersion Experience OR Topic Driven Signature Assignment

EXAMPLE 1

PBL as CREATE YOUR OWN ADVENTURE COURSE

First Year Composition Course

Create Your Own Adventure/ sync with course goals, SLO, & discipline- specific content

In W131/140, students explore concepts beyond writing together, as they consider “contact zones” and autoethnography.

FOUNDATIONAL scholarly READ:
Pratt’s “Arts of the Contact Zone”

Then we watch a documentary film together of someone exploring an idea/going on an adventure [note to faculty: pick one that inspires you, so you can share this enthusiasm]

Challenge students to explore a new or familiar ‘contact zone.’ They pick something and do it, then research/write/share about it in content-relevant assignment

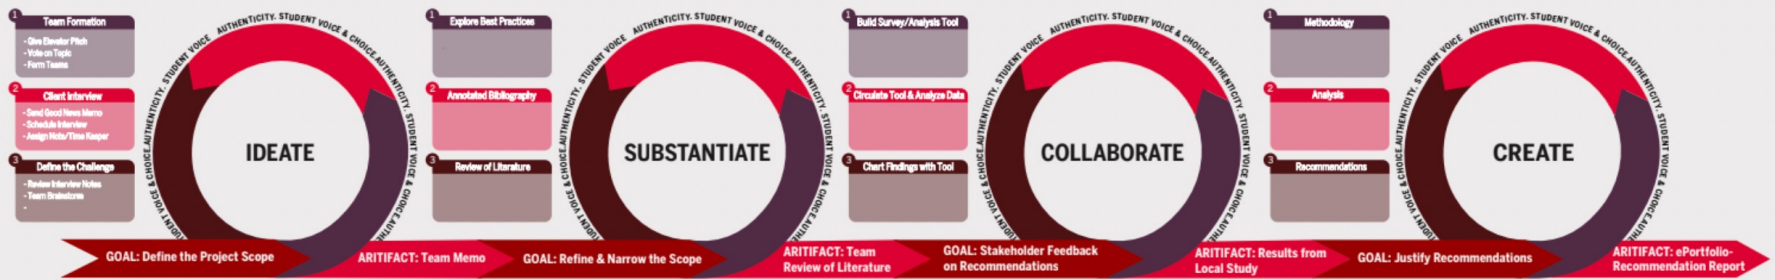

Everything Connects with Everything

Visuals of student project processes.

Create Connections between Course Content at Every Step/Stage in the Student Project

DESIGN TEACHABLE MOMENTS

Help students connect their experiences back to course content at every phase of the PBL experience through common reads, think-pair-share, step/stages weekly updates/deadlines, peer review, and sharing artifacts in the ePortfolio

- Give them Structure + Time
- Open the Door for Failure + Resilience
- Mentor through class-work time [check in with each individual student or share a sign up list for office meetings]

PBL IN PRACTICE

I opted to move away from the cornerstone of my field: the essay *[blasphemous]*

Example of Project-Based Learning in a Common Intellectual Experience

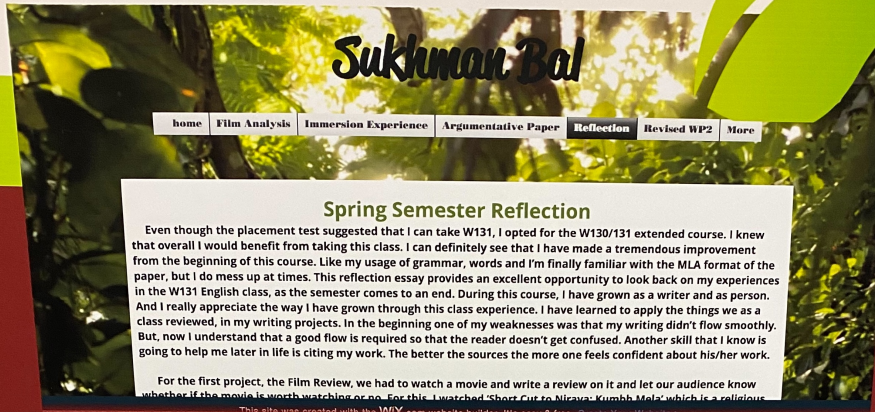

First Year Composition via Familiar Genres

- **Writing Project 1:** Documentary Film Review
- **Writing Project 2:** Feature Style Narrative Article about an Immersion Experience
 - Students venture into new –or- familiar contact zones
- **Writing Project 3:** Formal Argument on a Topic that Emerged from the Students Course Experiences

nts from diverse backgrounds to better serve students with diverse backgrounds and the LEAP Challenge. The use of more diverse learning opportunities that encourage students to move beyond their comfort zones.

Each students' body of work builds across projects, across self-selected readings, and across genres culminating in a Signature Assignment: their ePortfolios

"It is high time to old 'breadth first, depth college learning. It guided pathways to adaptive learning. We all students are given to tackle complex from first to fin"

— Carl

Students explore topics and ideas, then select and schedule an immersion experience.
Once a plan is in place, students begin research. Documentaries helps students learn more about the spaces they will explore.

ARIEL GASTELUM

Losing David

PUBLISHED ON February

It was unexpected. It was devastating. It was unfair. He was my cousin. He was one of the kindest people I have had the pleasure to meet in my life. He was simple, he was temperamental, he was happy. David was 19 years old. He was the middle children, the torment of my childhood, a best grandchildren, brother, cousin, and son than anyone on my family could have asked for. He a lot of things, but overall, he was too young.

Rhetorical Context and Hyper-Textuality

- ePortfolios are valuable tools for teaching Rhetorical Context and the roles of audience and purpose in writing
 - **No more hypothetical scenarios and fake assignments**—students are writing to a specific audience and reaching them through the internet-based micro-ePortfolio
- ePortfolio provide Hyper-Textuality by linking comments and sources directly to ongoing conversations through hyperlinks
 - [link to Mike Sandbothe's "Interactivity - Hypertextuality - Transversality. A media-philosophical analysis of the Internet"]
- Makes Often Invisible Stages of Projects Visible
- **EXAMPLE: Sharing photos from the Immersion Experience**

ePortfolios help students see the web of related research materials through their hyperlinks. These help students demonstrate the ways they are joining and contributing to ongoing conversations.

I echo Kathleen Yancey's Bronx-AAEEBL keynote when she encourages ePortfolio users to be "extra linky."

Kathleen Yancey: Encourages students to be extra linky

Here's a link to one of her course syllabi:

- Helps bridge the student project/ real world divide

Survey Results

Our team collected 167 responses. We shared our survey on the Fishers Test Kitchen social media and our own personal social media. They were given 10 questions through a Google Survey link that was posted on social media platforms. Respondees were not required to answer any question they did not want to. We had our survey open for two weeks and after we received the results we constructed graphs through Canva with our final survey results. You can find our survey [here](#).

What age range do you fall into?

Which of the social media platforms listed below do you use the most?

Our Recommendations

The three recommendations in this report focus on driving business to the Fishers Test Kitchen through social media marketing. The team examined how to reach the target audience, post content, planning ahead and loyalty programs, and events that would draw customers into the building. All recommendations are based on extensive research and a local study.

Recommendation One: Using Social Media As A Marketing Tool, Best Practices and How to Target a Younger Audience

- Using Social Media to Attract a New, Younger Audience
 - Use the Power of Social Media to Market to Gen Zers

Recommendation Two: Make a Plan to Use Multi-Channel Marketing to Grow your Restaurant's Business

- Social Media Content Creation: Make a Plan for the Best Results
 - The Benefits of Blending Social Media Marketing and Traditional Marketing for Restaurants
 - Restaurant Social Media Success Plan: Keep It Fresh and Plan Ahead
 - Value of Planning and Creativity in Food Content Marketing
 - Using Social Media to Showcase Your Food Photography to Interest an Audience

Recommendation Three: Get Them Through the Door, How Interaction on Social Media Leads to Interaction in Person

- Social Media and Retail- The Money is in the Numbers
- Fast-Food-Gone-Gourmet is Using Social Media in a New Way
- Opportunities for Restaurants to Target Demographics that are Active on Social Media to Increase Business on Weeknights

Introduction + Methodology

Research Goal

Our team's goal was to work with the scope of determining how to market to our customer base through social media marketing. In order to tackle this research a broad body of information in relevance to social media marketing we used to conduct the research included: social media marketing, social media platforms, social media content creation, benefits of social media interaction, restaurant incentivization, loyalty programs, etc.

Division of the Research Process

To facilitate the research process, we divided the research into topics that were researched by a different team member.

- Adebola researched Social Media content and the benefits of planning
- Christina researched the Value of Planning and Creativity in Food Content
- Crysta researched Using the Power of Social Media to Market to Young Adults
- Katy researched Opportunities for Restaurants to Target Demographics on Social Media to Increase Business on Weeknights Through Events
- Mack researched Using Social Media to Showcase Your Food Photography
- Nicole researched Social Media and Retail.

Through individual research, a twenty-one source annotated bibliography and team meetings, we discussed our personal findings and we were able to understand the scope of the project. And we determined that the most important recommendations for the Fishers Test Kitchen would be these recommendations. We solely split and focused on these three recommendations.

- The Effectiveness of Social Media for Marketing to Young Adults (Millennials/ Gen-Z)
- The Importance of Planning and Strategizing for Social Media
- Translate the Demographic Information Into Physical Bodies in the Test Kitchen

However, we still wanted to know the choices of consumers and did not want to base it on common sense. Over the course of our research, our team relied primarily on two

Project-Based Learning & ePortfolios Layer High Impact Practices Into Signature Work to Meet AAC&U's LEAP Challenge

IUPUI
SCHOOL OF LIBERAL ARTS

Special thanks to the IUPUI ePortfolio Initiative for a grant funding the implementation of digital portfolios, and the IUPUI Center for Teaching and Learning's Forest DePuy for a digital poster template and training with Adobe iDesign

Real World Experiences & College Writing: Using ePortfolios to Meet the LEAP Challenge

by Deborah J. Oesch-Minor, IUPUI Department of English

In 2015, AAC&U announced *The LEAP Challenge: Education for a World of Unscripted Problems*. The goal was to better prepare students to "understand and manage complexity, diversity, and change" through "high-level transferrable skills, including communication."

The introductory writing courses I teach at IUPUI meet the LEAP Challenge by integrating high impact practices (HIPs) like experiential learning and reflection with multimodal discourse strategies and a WIX ePortfolio.

In Stretch W131: Reading, Writing and Inquiry students self-select a real world project to explore for the entire semester. Their research and writing projects culminate in a signature work - a WIX ePortfolio.

Students build their signature work around three writing projects: a documentary film review, a feature article, and a formal argument. Students help build assessment rubrics to ensure that they are invested in every stage of their projects' development. Writing projects are assessed as students meet periodic deadlines.

The integration of HIPs like experiential learning, writing, and reflection helps students take control of their education as they define topics of interest and explore them personally. Students take the lead in the semester long project, which cultivates inquiry, insights, empathy, and knowledge.

Each time a formal draft of a writing project is due, students meet in a computer lab rather than a traditional classroom. Students transfer their projects onto WIX pages and begin editing the materials to meet the needs and expectations of their target audiences. Students build webpage tabs, populate the pages, then add titles, images/photos, hyperlinks, and pull out quotes.

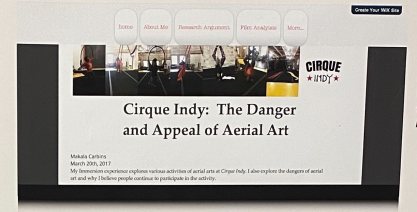

Students create dramatic visual appeal through their WIX designs. This blend of form and function showcases their use of multimodal discourse strategies to engage multiple audiences.

At the end of the semester, students have a well-designed WIX page with three writing projects, a home page and reflections to serve as their ePortfolio. This signature work meets IUPUI Writing Program requirements for the W131 final portfolio, completing a general education writing requirement. In addition to meeting a degree requirement, student reflections affirm the positive impact of the curricular design: "Throughout this semester, I have gained empathy, awareness, and maturity. This is a direct result of participating in workshops with my professor... I fully understand my writing style and habits because of the thorough reviews of each project. There is no doubt in my mind that this course will assist me during future endeavors" (student reflection, Spring 2017).

The semester-long signature work goes beyond the one-size-fits-all approach to classroom management.

- The ePortfolio encourages both breadth and depth by challenging students to engage a topic through a variety of genres and research lenses.
- Students do research in person through interviews as well as online using academic databases which helps them foster intellectual inquiry and independence.
- The open topic orientation and carefully scaffolded assignments meet students where they are and direct them step-by-step toward their signature works.
- Students from diverse backgrounds are better served through HIPs and the LEAP Challenge because of more diverse learning opportunities that encourage students to move beyond their comfort zones.

Makala's semester project explored the world of aerial art and elephants in the circus.

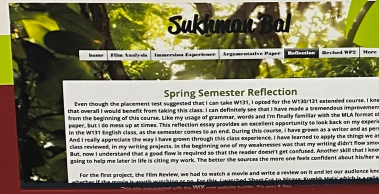

Film Review: The Greatest Show on Earth
Feature Article: Cirque Indy and Aerial Art
Formal Argument: Elephants in the Circus

"My writing ability has been shaped by the projects that were assigned in English W131. Each assignment allowed me to explore my interest in the circus and master the goals of the class to become a more confident writer."
—Makala Carbins

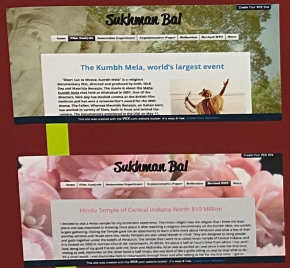

"Creating and revising a WIX website during the semester was very beneficial... If someone were to question a certain piece of data, the source is a click away."
—Jade Whelan

Jade's semester project centered on a ride along with an officer from the Indianapolis Metropolitan Police Department's North District.
Film Review: 13th Ave DuVernay's documentary
Feature Article: MPD's role along
Formal Argument, Media Coverage & Attitudes on policing

Students explore topics and ideas, then select and schedule an immersion experience. Once a plan is in place, students begin research. Documentaries helps students learn more about the spaces they will explore.

"It is high time to break free of the old 'breadth first, depth second' model for college learning. Instead, we need guided pathways to integrate any adaptive learning. We must ensure that all students are given opportunities to tackle complex questions— from first to final year."
—Carol Geary Schneider, President, AAC&U

ePORTFOLIOs provide avenues for students to document and share each step of their research and learning to create transparency.

ePortfolios make invisible aspects of their learning process VISIBLE for personal reflection, faculty/program assessment, and professional advancement

Susan Kahn's AAEEBL Keynote Commented on:

ePortfolio as Knowledge Structure

ePortfolios both embody and demonstrate learning because they are themselves authentic evidence

**Employers value the shift toward
HIPs, especially those that give them
a window into applicant
competencies: ePortfolios provide
access to this authentic evidence**

It Takes More Than A Major:

Employer Priorities for College Learning and Student Success

Key findings from survey among 318 employers
Conducted January 9 – 13, 2013
for

Cited by Dr. Tia McNair 2014

Employers Want Students to Participate in HIPs and Have Evidence of Learning

Employers believe a variety of emerging educational practices have the potential to help graduates succeed.

■ Will help a lot to prepare college students for success after graduation ■ Will help a fair amount

Expecting students to develop the skills to research questions in their field and develop evidence-based analyses

Students complete significant project before graduation, demonstrating knowledge in major & analytical, problem-solving, communication skills

Students complete internship or community-based field project to connect classroom learning with real-world experiences

Expecting students to develop the skills to conduct research collaboratively with their peers

Students acquire hands-on experience with the methods of science to understand how scientific knowledge is developed

Expecting students to work through ethical issues and debates to form their own judgments about the issues at stake

It Takes More Than A Major:

Employer Priorities for College Learning and Student Success

Key findings from survey among 318 employers
Conducted January 9 – 13, 2013
for

Project-Oriented and Course-Oriented ePortfolios Provide Documentation that Is Useful to Cultivate Future Opportunities

Employers say that an electronic portfolio of students' work and knowledge areas would be useful in evaluating candidates for hire.

In addition to a recent college graduate's résumé and college transcript . . . how useful would it be to see an electronic portfolio of student work that demonstrates accomplishment in key skill and knowledge areas (effective communication, knowledge in their field, evidence-based reasoning, ethical decision-making)?

Over 8 in 10 employers surveyed said an ePortfolios would be useful or very useful

**Evidence of student participation in HIPs
can be documented using tools like
ePortfolios and is beneficial for**

**Students
Faculty
Assessment Gurus
Employers**

Micro-ePortfolios as a Practical Tool for Teaching and Assessment

**THEORY MEETS
PRACTICE: Getting
Faculty to Try
ePortfolios**

The Challenge:

Getting faculty members and academic programs unfamiliar with ePortfolio to try ePortfolios

Common Faculty Objections:

- I don't know how to use the technology
- I don't have time to teach technology
- I don't see why this matters more than a good 'ole APA research paper
- I never did that when I was in school

ePortfolios Integrated at the Course Level

- To support faculty members as they consider and experiment with ePortfolios, advocates can
 - **Share examples**
 - **Explain expectations**
 - **Verify benefits**
 - **Address fears**

The Reality:

Getting faculty members to try PBL/ePortfolios is a challenge

- I don't know how to use the technology: **but your students already do**
- I don't have time to teach technology: **you don't have to—but if you want to highlight the basics, it takes about 15 minutes**
- I don't see why this matters more than a good 'ole APA research paper: **think both-and rather than either-or**
- I never did that when I was in school: **that doesn't mean it isn't valuable now, in the age of internet learning**

Add one project-oriented ePortfolio to one class: see the benefits for yourself

Add one PBL to each year in your major: analyze the outcomes

Benefits for Faculty

- Demonstrates Student Mastery of Course Concepts
- Enables Faculty to See Students Creativity and Innovation as They Curate Their Work
- Quick Links to Research and References
- Easily Accessible and Easily Navigated to Expedite Assessment and Evaluation

Benefits for Programs

Assessment: Evidence
Assessment: Engagement
Assessment: External Outcomes

Image from Faculty Focus
<https://www.pinterest.com/pin/383509724497930543/>

Tangible Benefits for Students

- Hyper Contextualizes the Project
- Convenient for Building and Sharing Materials
- Supports Curation of Artifacts [not one and done]
- Gives Student More Control of Their Educational Experience
- Lives on After the Class
- Cultivates Ownership

Image from Faculty Focus

ePortfolios Over ONE Project-Oriented ePortfolios

- Student: The micro-ePortfolio was more than a file folder, it encapsulated and demonstrated everything we were learning
- Annemarie: "The micro-ePortfolio helped me speak to both the topic and organization using skill we learned in class . . . The way we presented the report and evidence helped us demonstrate our credibility and compel the client to embrace team recommendations."
- Sophie: "From a STEM background as a Bio major, this would be an awesome tool for organizing, reporting, and sending out lab/research information. This tool is definitely not strictly for writing classes and can be integrated into so many different aspects, like resumes, lab reports, and research opportunities."

Recommendation #3: Establish a Stronger Twitter Presence for Event Information Distribution
Our team sought to determine how enhancing Women4Change's Twitter presence could benefit the organization's event attendance. The team researched how to utilize social media for marketing and what platforms seem to be most popular among students in college.

Figure 4 illustrates often, a question Snapchat. Local Study Responses: Top 3 Social Media Platforms That Were Recorded as "Most Often Used" Based on Student Responses. Instagram, and Snapchat use most often, a question Snapchat.

Figure 4 shows the distribution of responses when asked the question, "What forms of social media do you most often use?"

While Instagram and Snapchat rank slightly above Twitter, according to the local study survey conducted and presented in Figure 4, based on previous conversations with Isra Haider, Women4Change already has an active Instagram account and did not foresee Snapchat as a feasible medium. As a team, we feel that Twitter has many benefits and can prove to be a promising platform to pursue.

Using Twitter as a Way of Developing a Community for Women4Change Active and Potential Members on Social Media

The idea of belonging to a community is, what some say, drives the desire to use social media platforms, such as Twitter. According to an article written about the effectiveness of online advertising, "Research proves that the main motivators for using these web pages are driven by consumer's need to build and nurture social relationships" (Pikas & Sorrentino, 2014, p. 71).

LOCAL STUDY

In order to identify the specific results for marketing and finding the optimal way to spread the Women4Change organization, we constructed a survey that consisted of questions that would identify the critical data we needed. This was our second wave of research on how popular the organization was/was not and how to reach the attention of college students.

We have added the survey link for the survey for opportunity to read through it or take it yourself: [Women4Change Survey Monkey](#)

Question #1: Have you ever attended an event or activity hosted by IUUPI's Women4Change organization?

Answer Selection:

- Yes, I have attended multiple Women4Change events
- Yes, I have attended at least one Women4Change events
- No, I have not attended a Women4Change event
- No, I have not heard of the Women4Change organization

ANSWER CHOICES	RESPONSES
Yes, I have attended multiple Women4Change events	0.00% 0
Yes, I have attended at least one Women4Change event	7.80% 3
No, I have not attended a Women4Change event	42.20% 17
No, I have not heard of the Women4Change organization	50.00% 20

ePortfolios Demonstrate Metacognition:

As part of folio-thinking, students reflect on what they're doing, why they're doing it, and use multi-modal design strategies that emphasize key points and guide the reader through their documents.

Students also practice shaping materials for multiple audiences—peers, the professor, and the community client.

The ePortfolio helps students be more conscientious and intentional about reflection.

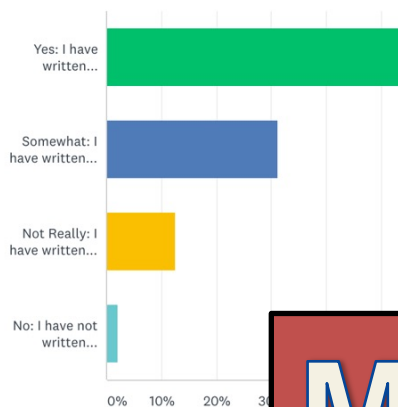

Public Facing ePortfolios: Can Help Emphasize the Role of Reflection

UNDERSTANDING THE ROLE OF REFLECTION PRE

Peer Review
Reflective E-portfolios: One HIP to Rule Them All?
By: David Hubert, Jason Pickavance and Amanda Hyberger

As colleges and universities embrace high-impact practices (HIPs), we can envision a future—as yet a fantasy world—where they become more common, anchored in curricular pathways and designed to improve the retention and graduation rates of new majority students. At the same time, we see the accelerating adoption trajectory of electronic portfolios (e-portfolios), which suggests that they might also become commonplace in our higher education system. What would the educational landscape look like in this future where HIPs and e-portfolios took prominent places in the lives of students at colleges and universities?

Interdisciplinary workspaces and Incentives to increase foot traffic to the library

Interdisciplinary workspaces allow for more collaborative work between students across several different subjects. Like modular workspaces, these can be moved around to different parts and put back together into different shapes around the school, rather than having to be stuck in one place.

Create a rewards program (like Qdoba or Starbucks) to increase foot traffic to the library. If the Orchard school incentivizes the library and trips to the library, they can increase the foot traffic to the library. Creating a rewards card / punch card or points program could be key to incentivizing kids and teachers to go to the library. The school could make it a year-long contest: whichever grade (or class) has the most points accumulated, they would get a special prize or treat at the end of the year. The end-of-year deadline is to ensure that people will still keep coming all year long as opposed to a short-term contest where people may only be pulled to the library and not come back after the contest is over.

- Rewards cards work with businesses and have success
- Keeps people coming back
- Reinforces the behavior of doing something right (turning a book in on time)

Ecological Literacy in the Library enhanced by Adding Indoor Gardens

In this section of analysis, the focus is how to best incorporate the natural world into the library – keeping with Orchard's intention. The first research phase using IUPUI's databases revealed that many libraries have undergone major renovations to become more environmentally centered (Falkenburg, 2012). Cutting edge libraries and other workspaces around the world have been installing foliage inside of their buildings. The trend is catching on because of the overwhelming positive benefits:

- Reduced levels of carbon dioxide, nitrogen dioxide, and dust.
- Easy interior design.
- Mood improvement.
- Noise reduction.
- Lower risk of illness.
- Enhanced concentration.

Gary Altman, Director of the Horticulture Therapy program at Rutgers, said this when discussing the psychological benefits of caring for a garden. "Potting plants and actively maintaining them provides an opportunity to forget about troublesome, stressful things that may be going on in your life, and focus on the here-and-now. While this is helpful to us and our psychological wellbeing, the plant enjoys this care as well, and grows better and is better

and/or a laptop that can run VR well.

Implement Interdisciplinary work spaces, Flexible furniture to create more collaborative environment and Incentives to increase foot traffic to the library

Interdisciplinary use of flexible furniture ties into Orchard School's pre-existing spaces throughout the building allowing for optimum flow of energy, use, and aura, along with their hands-on and collaborative learning styles so that the furniture can be used for many things, in many different ways for a long time.

- Create a rewards program that rewards kids (of all grades) for going to the library and checking out books and returning them on time
 - Make it a year-long competition between all the grades, the grade with the most total points wins a prize.
- Have Modular Furniture (furniture that is easy to move, make different shapes, put back together, and sturdy)
 - Such as LoveSac, School Outfitters, Poppin, Constructiveplaythings.com
- Set up the new furniture in shapes conducive to learning, the aura and architectural flow of the room increase work-flow and welcoming feel of the environment
 - Circles, small 4x4 squares, a sectional-style living room (furniture on one side, a table in the middle, and furniture on the other side)
- Put rubber grips on the bottom of chairs and tables (if they don't already have them) to make it easier to move them around the room

Design and Install a Vertical-Hanging Garden in the Library

A garden will bring Orchard's mission of nature-based learning into the library, while also engaging children with non-linear learning techniques.

- Consider bringing in a landscape architect to consult on the project.
- Assess the library for climate and lighting conditions for the plants, then select the plants accordingly. Recommendations for resilient, low-light plants are located in Appendix B.
- Decide what water delivery system will be utilized e.g. hydroponics, manual watering.
- Implement and care for the new garden.

Natalie Muhammed

- “ePortfolio was value added for me—even though I have a graduate degree—because it brings a different perspective and experience with technology.”
- “I can transfer ePortfolio building skills into my Masters in Biochemistry and Molecular Biology.”

Natalie starts med school this August, in New Orleans

Analysis

INTRODUCTION:

Our team sought ways we could provide the Camp Cavy Guinea Pig Rescue with recommendations that will enhance the Rescue's performance and help these guinea pigs find a good home.

There are many guinea pigs that end up in rescue for various reasons. That means that the rescues need to be prepared for future pigs as well as taking care of current ones. Since the rescue is a nonprofit, it is supported by Angela and any additional donations she receives. Social exposure and building networks can assist the rescue by getting these donations. This means posting on social media, creating events that invite community members to see the guinea pigs, and spreading awareness about the rescue. The community members can offer further resources whether it is collaborating with the rescue, donating money, or volunteering their time. The following explains what we found and why it is beneficial for the rescue.

RECOMMENDATION 1. Participate in social networking

Understanding what social networking is

According to Susan Ward in her What Is Business Networking & What Are the Benefits the definition of networking is:

“Business networking is the process of establishing a mutually beneficial relationship with other business people and potential clients and/or customers. The primary purpose of business networking is to tell others about your business and hopefully turn them into customers.”

In order to do so, you need to have a common mindset that you have something that someone else wants, while the other person has something you want. An example would be you connecting with a pet supply company to have a promo code the

Recommendations

LIST OF RECOMMENDATIONS:

1. Participate in social networking

- Find similar organizations to collaborate with
- Take part in the festivals/fairs/conventions and other events organized by fellow rescue organizations

2. Create opportunities to receive external help from the community

- Use the help of volunteers
- Organize fundraisers/ donation events
- Post donation/sponsorship links on the website (Amazon smile, Petco foundation)

3. Communicate with the rescue's audience more effectively:

- Organize adoption parties
- Include the detailed description of the guinea pigs up for adoption
- Create rescue posters. Ask the website visitors to print them out/place on the local community board
- Offer free services such as nail-clipping, guinea pig care and housing advice.

Getting Beyond the Label:
What Makes High-Quality HIPS, How
Widespread Are They,
and Who Has Access to Them?

Alexander C. McCormick, Jillian Kinzie, Robert Gonyea,
Brendan Dugan, Samantha Silberstein

Indiana University Center for Postsecondary Research

ePortfolios are a benefit when they include best practices—exactly the sorts of student engagement we hope for in Project-Based Learning

< Hyperlink

One Assessment Institute Presentation's List of Essential Qualities of HIPS

1. High performance expectations
2. Significant investment of student time and effort over an extended period
3. Interactions with faculty and peers about substantive matters
4. Students are exposed to and must contend with people and circumstances that differ from those with which they are familiar
5. Frequent, timely, and constructive feedback
6. Periodic, structured opportunities to reflect and integrate learning
7. Opportunities to discover relevance of learning through real-world applications
8. Public demonstration of competence

SCHOOL OF LIBERAL ARTS

This is an argument for more flexibility in the way we conceptualize and use folio thinking as part of rigorous examination of the value of ePortfolios.

Project-Based Learning

[like Signature Assignments]

provides unique opportunities for faculty to design storied learning experiences for students that allow them to build self-contained, reflective ePortfolios to document learning related to a specific objective or objectives AND create low-risk opportunities for faculty to experiment with ePortfolios.

Guided: Brainstorming Your Options

- ePortfolios are valuable additions
 - Class Projects
 - Graduation Portfolios
 - Program Assessment
 - Internships
 - Study Abroad
- **List 5 ideas you have for implementing ePortfolios**

[Take 2 minutes]

Exploring Benefits

- Look back at your list of different ideas and uses for ePortfolios
- Using lists or building a web, **jot down ways in which these ePortfolios could help you meet pedagogical, assessment, or program objectives**

[2 minutes]

Focusing on One Idea

- Look back at your notes
- Which idea seems most promising?
- Circle it.
- For 2 minutes, write about how you could shape the micro-ePortfolio component to achieve your goals

[2 minutes]
